

Vanishing Act

See them while you can
Go see the orang-utan
It is way too hot
And this planet is all we've got

Look at the pollution in Hong Kong
Don't you think it's wrong?
Indeed, it's been too long

What about the great barrier reef?
Before we are struck with grief
Plastic chokes our symbiose
And is unfair to those
Who fight while others won't

What once was a green planet
Is now a burning flame
When will we realise there is no safety net?
That this is not a game?

And because of the warm air,
We witness the suffering of the polar bear
Do you think that's fair?
Because of the polluted water
We witness the pain of others

Too many things need to go
It is melting our snow
Factories, greenhouse gas
These things have got to go

Well in fact,
We all need to act
If not, we will vanish
All we have to do is get plastic banished!
